

Knowledge:

Find out about possible materials that could be used to make your cave strong, dry and warm?

You could test the materials in water, wind and by pulling them apart to see if they rip.

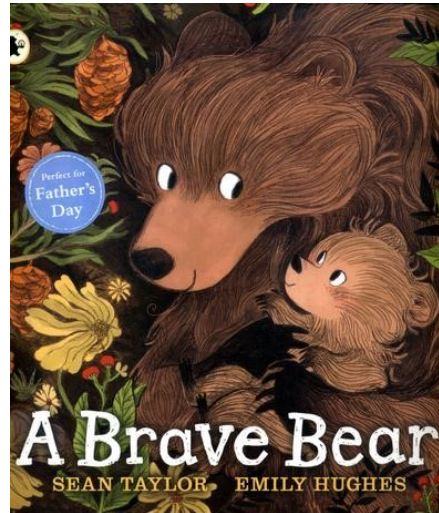

Which is the strongest material?

Which is waterproof?

Home Learning Project Reception

Deadline for Home Learning
Monday 7th October

Creative:

Design a Cave for the bears to keep them safe.

What material will you use and why?

How will you attach your materials together?

How will you keep the bears house waterproof?

What shape is your cave?

What materials will keep the bear warm and dry?
